## **Abstract**

This bibliography of laser applications contains 644 entries from the open literature for the period 1961 through September 1966. The entries are divided into the following major areas: mechanical measurements and standards; communications applications; radar and tracking applications; military applications; optical signal processing; interferometry and testing of optical components; applications to scientific studies; applications in chemistry; photographic applications; metalworking; and miscellaneous applications. The entries are further subdivided into 78 other categories. Applications in medical and biological research are not included; complete coverage in the other areas is not guaranteed. Under some topics (detection techniques, spectroscopy, interaction with acoustic waves, plasma diagnostics, nonlinear optics, gas breakdown, scattering, holography) so much has been published that only review articles, articles of major importance, and very recent articles could be included.

## Preface

The motivation for the compilation of this bibliography was originally provided by the Research and Education Association, 420 Madison Avenue, New York, N. Y.; it was distributed at a lecture sponsored by that organization along with descriptive lecture notes dealing with the same subject. Later it was updated thru September 1966 for inclusion as an appendix to the chapter on applications of lasers in Lasers: Principles and Applications, McGraw-Hill Book Company; however, it had to be deleted at the last moment because of the length of the book. Descriptive material on laser applications that partially follows the outline of this bibliography can be found in that book. An earlier version of this material was published as Applications of Lasers by C. Martin Stickley, AFCRL 64-914 (AD 609 846). At the present time there are no plans for further updating of this bibliography.

The second author of this bibliography, Arthur Gingrande, Lt. Col. AFRes, participated in the preparation of this during a two-week reserve duty tour at AFCRL during the summer of 1966; he is presently at the Western Electric Co., Lawrence, Massachusetts.

 Marsh, D. I., V. V. Morozov, V. S. Starvuncov, E. V. Tiganov, and I. L. Fabelinski, "Induced Mandel'shtam-Brillouin scattering in solid amorphous bodies and in liquids", JETP Letters 2, pp. 157-160; 1 Sept 1965  
 Fabelinski, I. L., "Study of the structure of the lines of scattered light and the propagation of hypersound", Soviet Physics Uspekhi 8, pp. 637-641; Mar-Apr 1966  
 Rentzepis, P. M., and Y. H. Pao, "Generation of sound waves in liquids accompanying two-photon absorption", J. Chem. Phys. 44, pp. 2931-2934; 15 Apr 1966  
 Clark, N. A., C. E. Moeller, J. A. Bucaro, and E. F. Carome, "Hypersonic velocity measurements in liquid dichloromethane", J. Chem. Phys. 44, pp. 2528-2529; 15 May 1966  
 Brewer, R. G., "Stimulated Brillouin shifts by optical beats", App. Phys. Letters 9, pp. 51-53; 1 July 1966  
 Stone, J., "Hypersonic velocity measurements in aqueous alkali halide solutions", J. Opt. Soc. Am. 56, pp. 1136-1137; Aug 1966

## 9.0 PHOTOGRAPHIC APPLICATIONS

### 9.1 Holography

#### 9.1.1 INTRODUCTORY AND REVIEW ARTICLES

- Stroke, G. W., "Lensless photography", Internat'l Sci. Tech. 41, pp. 52-60; May 1965
- Leith, E. N. and J. Upatnieks, "Photography by laser", Sci. Am. 212, pp. 24-35; June 1965
- Leith, E., and J. Upatnieks, "Wavefront reconstruction photography", Phys. Today 18, pp. 26-30; Aug 1965
- Pennington, K. S., "How to make laser holograms", Micro-waves 4, pp. 35-40; Oct 1965
- Eaglesfield, C. C., "Holograms: what uses have they?", Discovery 27, pg. 23; June 1966
- Collier, R. J., "Some current views on holography", IEEE Spectrum 3, pp. 67-74; July 1966

#### 9.1.2 EARLY THEORY OF HOLOGRAPHY

- Gabor, D., "Microscopy by reconstructed wavefront", Proc. Roy. Soc. (London), Ser. A, 197, pp. 454-487; 7 July 1949
- Rogers, G. L., "Experiments in diffraction microscopy", Proc. Roy. Soc. (Edinburgh), Sec. A. 63, pp. 193-221; 1952
- Leith, E. N., and J. Upatnieks, "Wavefront reconstruction with diffused illumination and three dimensional objects", J. Opt. Soc. Am. 54, pp. 1295-1301; Nov 1964

#### 9.1.3 VOLUME ASPECTS OF HOLOGRAPHY

- Denisyuk, Yu N., "Representation of optical properties of an objective by means of wave pattern of light scattered by it", Soviet Phys. Doklady 7, pp. 543-545; Dec 1962
- van Heerden, P. J., "Theory of optical information storage in solids", Appl. Opt. 2, pp. 393-400; Apr 1963
- Denisyuk, Yu N., "On the reproduction of an object by the wave field of its scattered radiation", Opt. Spectros. 15, pp. 279-284, Oct. 1963; 18, pp. 152-157; Jan 1965
- Pennington, K. S., and Lin, L. H., "Multicolor wavefront reconstruction", Appl. Phys. Letters 7, pp. 56-57; 1 Aug 1965
- Leith, E. N., A. Loosma, J. Upatnick, J. Marks, and N. Massey, "Holographic data storage in three dimensional media", Appl. Opt. 5, pp. 1303-1311; Aug 1966

#### 9.1.4 HOLOGRAM IMAGING PROPERTIES

- Armstrong, J. A., "Fresnel holograms: their imaging properties and aberrations", IBM J. Res. Develop. 9, pp. 171-178; May 1965
- Leith, E. N., Upatnieks, J., and K. A., Haines, "Microscopy by wavefront reconstruction", J. Opt. Soc. Am. 55, pp. 981-986; Aug 1965
- Meier, R. W., "Magnification and third order aberrations in holography", J. Opt. Soc. Am. 55, pp. 987-992; Aug 1965

Meier, R. W., "Cardinal points and the novel imaging points of a holographic system", J. Opt. Soc. Am. 56, pp. 219-223; Feb 1966

#### 9.1.5 TECHNIQUES IN HOLOGRAPHY

Stroke, G. W., D. Brumm, and A. Funkhauser, "Three-dimensional holography with "lensless" Fourier transform holograms and coarse P/N Polaroid film", J. Opt. Soc. Am. 55, pp. 1327-1328; Oct 1965

Stroke, G. W., and Labeyrie, A. E., "White-light reconstruction of holographic images using the Lippman-Bragg diffraction effect", Phys. Letters 20, pp. 367-369; 1 Mar 1966

Lin, L. H., Pennington, K. S., G. W. Stroke, and A. E. Labeyrie, "Multicolor image construction with white light illumination", Bell Sys. Tech. J. 45, pp. 659-661; Apr 1966

Harris, F. S., G. C. Sherman, and B. H. Billings, "Copying holograms", Appl. Opt. 5, pp. 665-666; Apr 1966

Urbach, J. C., and R. W. Meir, "Thermoplastic xerographic holography", Appl. Opt. 5, pp. 666-667; Apr 1966

Wilmot, D. R., E. R. Schineller, and R. W. Heuman, "Hologram illumination with a flashlight", Proc. IEEE 54, pp. 690-692; Apr 1966

Pole, R. V., H. Wieder, and R.A. Myers, "React ve processing of phase objects", Appl. Phys. Letters 8, pp. 229-231; 1 May 1966

#### 9.2 High-Speed Photography

Courtney-Pratt, J. S., "Some uses of optical masers in photography", J. Soc. Motion Picture and TV Engineers 70, pp. 507-511; July 1961

Yajima, T., F. Shimizu, and K. Shimoda, "High speed photography using a ruby optical maser", App. Opt. 1, pp. 770-771; Nov 1962

Ellis, A. T., and M. E. Fourney, "Application of a ruby laser to high speed photography", Proc. IEEE 51, pp. 942-943; June 1963

Ebeling, D., "High speed cinematography with Q-switched laser flashes", Zeit. f. Ang. Math. und Physik 16, pp. 121-122; 25 Jan 1965

Tanner, L. H., "The application of lasers to time-resolved flow visualization", J. Sci. Instr. 42, pg. 125; June 1965

Brooks, R. E., L. O. Heflinger, R. F. Wuerker, and R. A. Briones, "Holographic photography of high speed phenomena with conventional and Q-switched lasers", Appl. Phys. Letters 7, pp. 92-94; 15 Aug 1965

Trammell, W. V., "Laser photography of hypervelocity projectiles", Rev. Sci. Instr. 36, pp. 1551-1553; Nov 1965

Christensen, A. B., and W. M. Isbell, "Technique for streak camera writing rate calibration using pulsed laser", Rev. Sci. Instr. 37, pp. 559-561; May 1966

### 9.3 Micrography

- Rogers, G. L., "Experiments in diffraction microscopy", Proc. Roy. Soc. (Edinburgh), Sec. A. 63, pp. 193-221; 1952
- Courtney-Pratt, J. S., "Optical masers and micrography", Bell Lab. Record 39, pg. 143; Apr 1961
- Rosan, R. C., M. K. Healy, and W. F. McNary, "Spectroscopic ultra-microanalysis with a laser", Sci. 142, pp. 236-237; 11 Oct 1963
- Peppers, N. A., "A laser microscope", Appl. Opt. 4, pg. 555-558; May 1965
- Stroke, G. W., "Lensless photography". Internat'l Sci. Tech. pp. 52-60; May 1965
- Carter, W. H., and A. A. Dougal, "High-quality three-dimensional records of microscope specimens on single microholograms utilizing gas laser illumination", IEEE J. Quan. Elec. QE-2, pg. lxiv; Apr 1966
- Vand, V., K. Vedam, and R. Stein, "The laser as a light source for ultramicroscopy and light scattering by imperfections in crystals. Investigation of imperfections in LiF, MgC, and ruby", J. Appl. Phys. 37, pp. 2551-2557; June 1966
- Gabor, D., and W. P. Goss, "Interference microscope with total wavefront reconstruction", J. Opt. Soc. Am. 56, pp. 849-858; July 1966

## 10.0 METALWORKING APPLICATIONS

### 10.1 Survey Articles

- Missio, D. V., "Effects of the laser beam", Proc. Nat. Elec. Conf. 19, pp. 569-573; 1963
- Kobrin, C. L., "Lasers: The piercing power of pure light", Iron Age 192, pp. 125-132; 15 Aug 1963
- Buddenhagen, D. D., "Laser goes miniature", SAE J. 72, pp. 40-45; Mar 1964
- Bahun, C. J., and R. D. Engquist, "Metals joining in the space age - by lasers", J. Metals 16, pp. 242-243; Mar 1964
- Ready, J. F., "Interaction of high power laser radiation with absorbing surfaces", Proc. Nat. Elec. Conf. 22, pp. 67-71; Oct 1964
- Young, D. S., "The laser as an industrial tool", The Engineer (Western Electric) 8, pp. 2-10; Oct 1964
- Panzer, V. S., "Die Anwendung des Lasers fur die Materialbearbeitung", Zeit. f. Ang. Math. und Physik 16, pp. 138-155; 25 Jan 1965
- Zuyev, V. S., "The industrial possibilities of lasers", STAR 3, pg. 2202(A); 8 July 1965

Ready, J. F., "Effects of laser radiation", Industrial Research 7, pp. 44-50; Aug 1965

### **10.2 Welding**

#### **10.2.1 WELDING OF METALS**

Sherman, R. A., "Microwelding and microdrilling with lasers", Ann. N. Y. Acad. Sci. 122, pp. 650-657; 28 May 1965

Miller, K. J., J. D. Nunnikhoven, "Laser welding", Machine Design 37, pg. 120; 5 Aug 1965

"Laser welding and machining", Engineering Proceedings P-44, 15 papers presented at the Engineering Seminar on New Industrial Technologies, Penn. State Univ.; 27 June to 2 July 1965

Schakleton, J. R., "Laser microwelding", Semicon. Prod. 8, pp. 15-19; May 1965

Schmidt, A. O., "An evaluation of laser performance in micro-welding", Welding Journal 44, pp. 48ls-489s; Nov 1965

Anderson, J. E., and J. E. Jackson, "An evaluation of pulsed laser welding", Proc. Electron and Laser Beam Symposium, edited by A. B. El-Kareh, sponsored by Penn. State Univ. and Alloyd General Corp. pp. 17-50; 31 Mar - 2 Apr 1965

Rykalin, N. N., "Heating of thin sheets in laser welding", Dokl. Akad. Nauk SSSR 165, pg. 319; 1963

Fairbanks, R. H., C. M. Adams, "Laser beam fusion welding", Welding Journal 43, pp. 97s-1020s; Mar 1964

Rykalin, N. N., Iu. L. Krasulin, "Estimation of energy parameters when metals are welded by a laser light flux", Dokl. Akad. Nauk SSSR 163, pp. 60-62; Jan 1965

#### **10.2.2 WELDING OF MICROCIRCUITS**

Rischall, H., "Laser welding of microelectronic interconnections", IEEE Trans. on Comp. Parts CP-11, pp. 145-151; June 1964

Price, T. E., "Laser welding of semiconductor integrated circuit interconnections", Ind. Elec. 2, pg. 478; Oct 1964

Orial, T. A., K. B. Steinbruegge, and P. S. Charf, "Laser welding of microcircuits", Proc. Electron and Laser Beam Symposium, edited by A. B. El-Kareh, sponsored by Penn. State Univ. and Alloyd General Corp., pp. 343-368; 31 Mar - 2 Apr 1965

Maas, P. A., "Laser beam welding electronic-component leads", Welding Journal 44, pp. 264s-269s; Junr 1965

13 ABSTRACT <p>This bibliography of laser applications contains 644 entries from the open literature for the period 1961 through September 1966. The entries are divided into the following major areas: mechanical measurements and standards; communications applications; radar and tracking applications; military applications; optical signal processing; interferometry and testing of optical components; applications to scientific studies; applications in chemistry; photographic applications; metallurgy; and miscellaneous applications. The entries are further subdivided into 78 other categories. Applications in medical and biological research are not included; complete coverage in the other areas is not guaranteed. Under some topics (detection techniques, spectroscopy, interaction with acoustic waves, plasma diagnostics, nonlinear optics, gas breakdown, scattering, holography) so much has been published that only review articles, articles of major importance, and very recent articles could be included.</p>

<b>Lasers, Bibliography, Laser Applications</b>						
<b>INSTRUCTIONS</b>						
1. ORIGINATING ACTIVITY: Enter the name and address of the contractor, subcontractor, grantee, Department of Defense activity or other organization (corporate author) issuing the report.	10. AVAILABILITY/LIMITATION NOTICES: Enter any limitations on further dissemination of the report, other than those imposed by security classification, using standard statements such as:					
2a. REPORT SECURITY CLASSIFICATION: Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.	<ul style="list-style-type: none"> <li>(1) "Qualified requesters may obtain copies of this report from DDC."</li> <li>(2) "Foreign announcement and dissemination of this report by DDC is not authorized."</li> <li>(3) "U. S. Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through</li> </ul>					
2b. GROUP: Automatic downgrading is specified in DoD Directive 5200.10 and Armed Forces Industrial Manual. Enter the group number. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.	<ul style="list-style-type: none"> <li>(4) "U. S. military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through</li> </ul>					
3. REPORT TITLE: Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.	<ul style="list-style-type: none"> <li>(5) "All distribution of this report is controlled. Qualified DDC users shall request through</li> </ul>					
4. DESCRIPTIVE NOTES: If appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is covered.	If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.					
5. AUTHOR(S): Enter the name(s) of author(s) as shown on or in the report. Enter last name, first name, middle initial. If military, show rank and branch of service. The name of the principal author is an absolute minimum requirement.	11. SUPPLEMENTARY NOTES: Use for additional explanatory notes.					
6. REPORT DATE: Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.	12. SPONSORING MILITARY ACTIVITY: Enter the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.					
7a. TOTAL NUMBER OF PAGES: The total page count should follow normal pagination procedures, i.e., enter the number of pages containing information.	13. ABSTRACT: Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.					
7b. NUMBER OF REFERENCES: Enter the total number of references cited in the report.	<p>It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).</p> <p>There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words.</p>					
8a. CONTRACT OR GRANT NUMBER: If appropriate, enter the applicable number of the contract or grant under which the report was written.	14. KEY WORDS: Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entries for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be followed by an indication of technical content. The assignment of links, rules, and weights is optional.					
8b, 8c. & 8d. PROJECT NUMBER: Enter the appropriate military department identification, such as project number, sub-project number, system number, task number, etc.						
9a. ORIGINATOR'S REPORT NUMBER(S): Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.						
9b. OTHER REPORT NUMBER(S): If the report has been assigned any other report numbers (either by the originator or by the sponsor), also enter this number(s).
